A THOUGHT THAT STARTED ALPENGLOW

Every development in the world is focused on making life better than what we are living today. Each day a new innovation takes place, a new idea clicks but an innovation is a wonder when it can make a difference without hampering the sustainability of the environment.

Our key focus at Alpenglw is to work towards constructing a world that makes living standards better in a manner that both nature and progress go hand in hand.

THE STORY BEHIND ALPENGLLOW

Started with basic projects to improve the status of the roads and highways, Alpenglow today has evolved into a substantial infrastructure development firm that has changed the outlook of the state. Although it has its roots in Tamil Nadu, India it has extended its footstep across the globe.

With a repute of on time delivery of projects along with precision maintained in every given contract, Alpenglow has achieved the status of being one of the largest and most preferred construction firms.

Though the company's presence is in the state for more than 5 decades, its projects are made to last for a lifetime.

In fact every aspect of Alpenglow projects are characterized by professionalism and high standards of corporate governance.

The company is expertised in construction of roadways, state of the art buildings and providing for Water Management Solutions.

THE FUTURE AND FOCUS OF THE COMPANY

Vision

The company envisages in bringing a sea of change in the way people live, connect, commute and derive from the givings of nature through its innovative ideas and meticulous implementations that are in tandem with sustainability.

Mission

The mission of the company is to become a global leader by enhancing its entrepreneurial skills, harnessing the spirit of its team and creating a benchmark of quality and sustainability in its work.

It aims to come in conglomeration with the leading companies of the world so that together they can make the world a better place to live in.

AT THE HELM

The journey of Alpenglow is vested under the magnanimous leadership of **Mr. V Senthil Kumar**. He is the reflection of the company's status and repute. It is under his guidance that Alpenglow has overcome multiple challenges, and emerged stronger.

A civil engineer by profession, **Mr. V Senthil Kumar** has spent his entire career in span in accomplishing massive development projects in not just the cities but the villages too.

His biggest challenge was working with the rural crowd, they were open to development but were hesitant to scramble their natural habitat.

His skill and mindful thinking has developed the outlook of many rural areas, without tampering with the sustainability of the environment.

He is the preferred name when it comes to construction of highways, corporation and town Panchayats. His immense knowledge and experience in undertaking water projects like

Borewell, Water Tanks has been applauded by the government and the public who has reaped benefits out of it.

It is under his headship Alpenglow has seen a remarkable increase across all parameters of business performance - market capitalization, consolidated turnover and net worth. His experience, proficiency and civil knowledge are a boon to the company.

The next at helm is **R. Krishnaswamy**, a renowned civil engineering contractor with more than 4 decades of experience, his experience gained over the years works as an advantage to company when tackling complicated situations.

Along with age old experience the company is supported by modern and up to date solutions by **Ms. Geethanjali R.K.** She is the youngest entrepreneur in the company with novice ideas and managerial skills that keeps the company at par with the upcoming companies.

THE TEAM THAT MAKES ALPENGLLOW THE MOST RELIABLE COMPANY

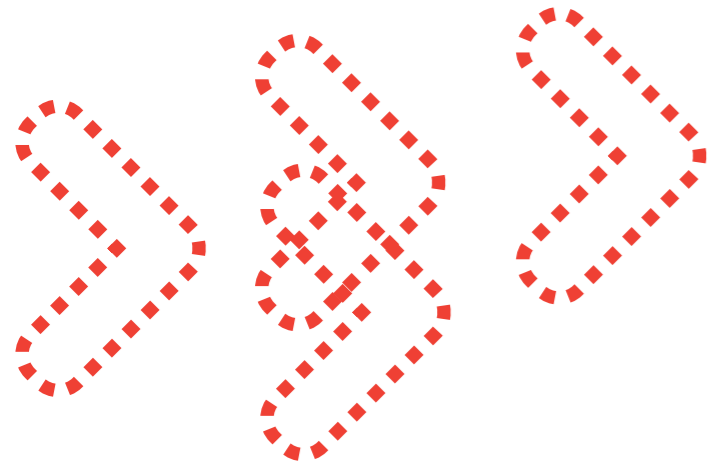

The team at Alpenglow is a union of more than 350 plus employees chosen on the basis of their knowledge, capabilities, attitude and value system. Every member of the team undergoes a periodical training to ensure they understand the latest technology and world class construction practices. They are empowered and encouraged to innovate keeping the customer in mind. Their integrated capabilities are customised to deliver world class facilities. The company's 50 year long experience combined with a strong, customer focused approach and a continuous quest for world-class quality makes them a leader among the rest.

Apart from that the company is equipped with unmatched expertise across Technology, Engineering, Construction, Infrastructure Projects and Manufacturing units.

Moreover every aspect of Alpenglow's works is characterized by professionalism and high standards of corporate governance, along with Sustainability embedded as a part of its long-term strategy for growth.

All this as a package makes Alpenglow the company to cohort and grow with.

AN EXAMPLE OF EXCELLENCE AND CHALLENGE

PART 1

One of the most astounding works of Alpenglow includes the laying of road on the Ooty-Mysore road.

The company was challenged to create a 16km road on a hilly terrain which had more than 38 windings road, dotted with steep hairpin turns, long S-Curves and sharp descents over an elevation of 1400m.

Apart from that the chilly weather of the city and the unavailability of the required hot Bitumen mix at the work site made it very difficult for the masons to lay the road. The entire mix was transported from the plains. Yet the company took up this perilous task, and within a span of just 50 days the road was ready.

And it was not just ready, it was a work that reflected absolute quality and excellence. Even with harsh weather conditions the grit of the road is intact and smooth to drive on.

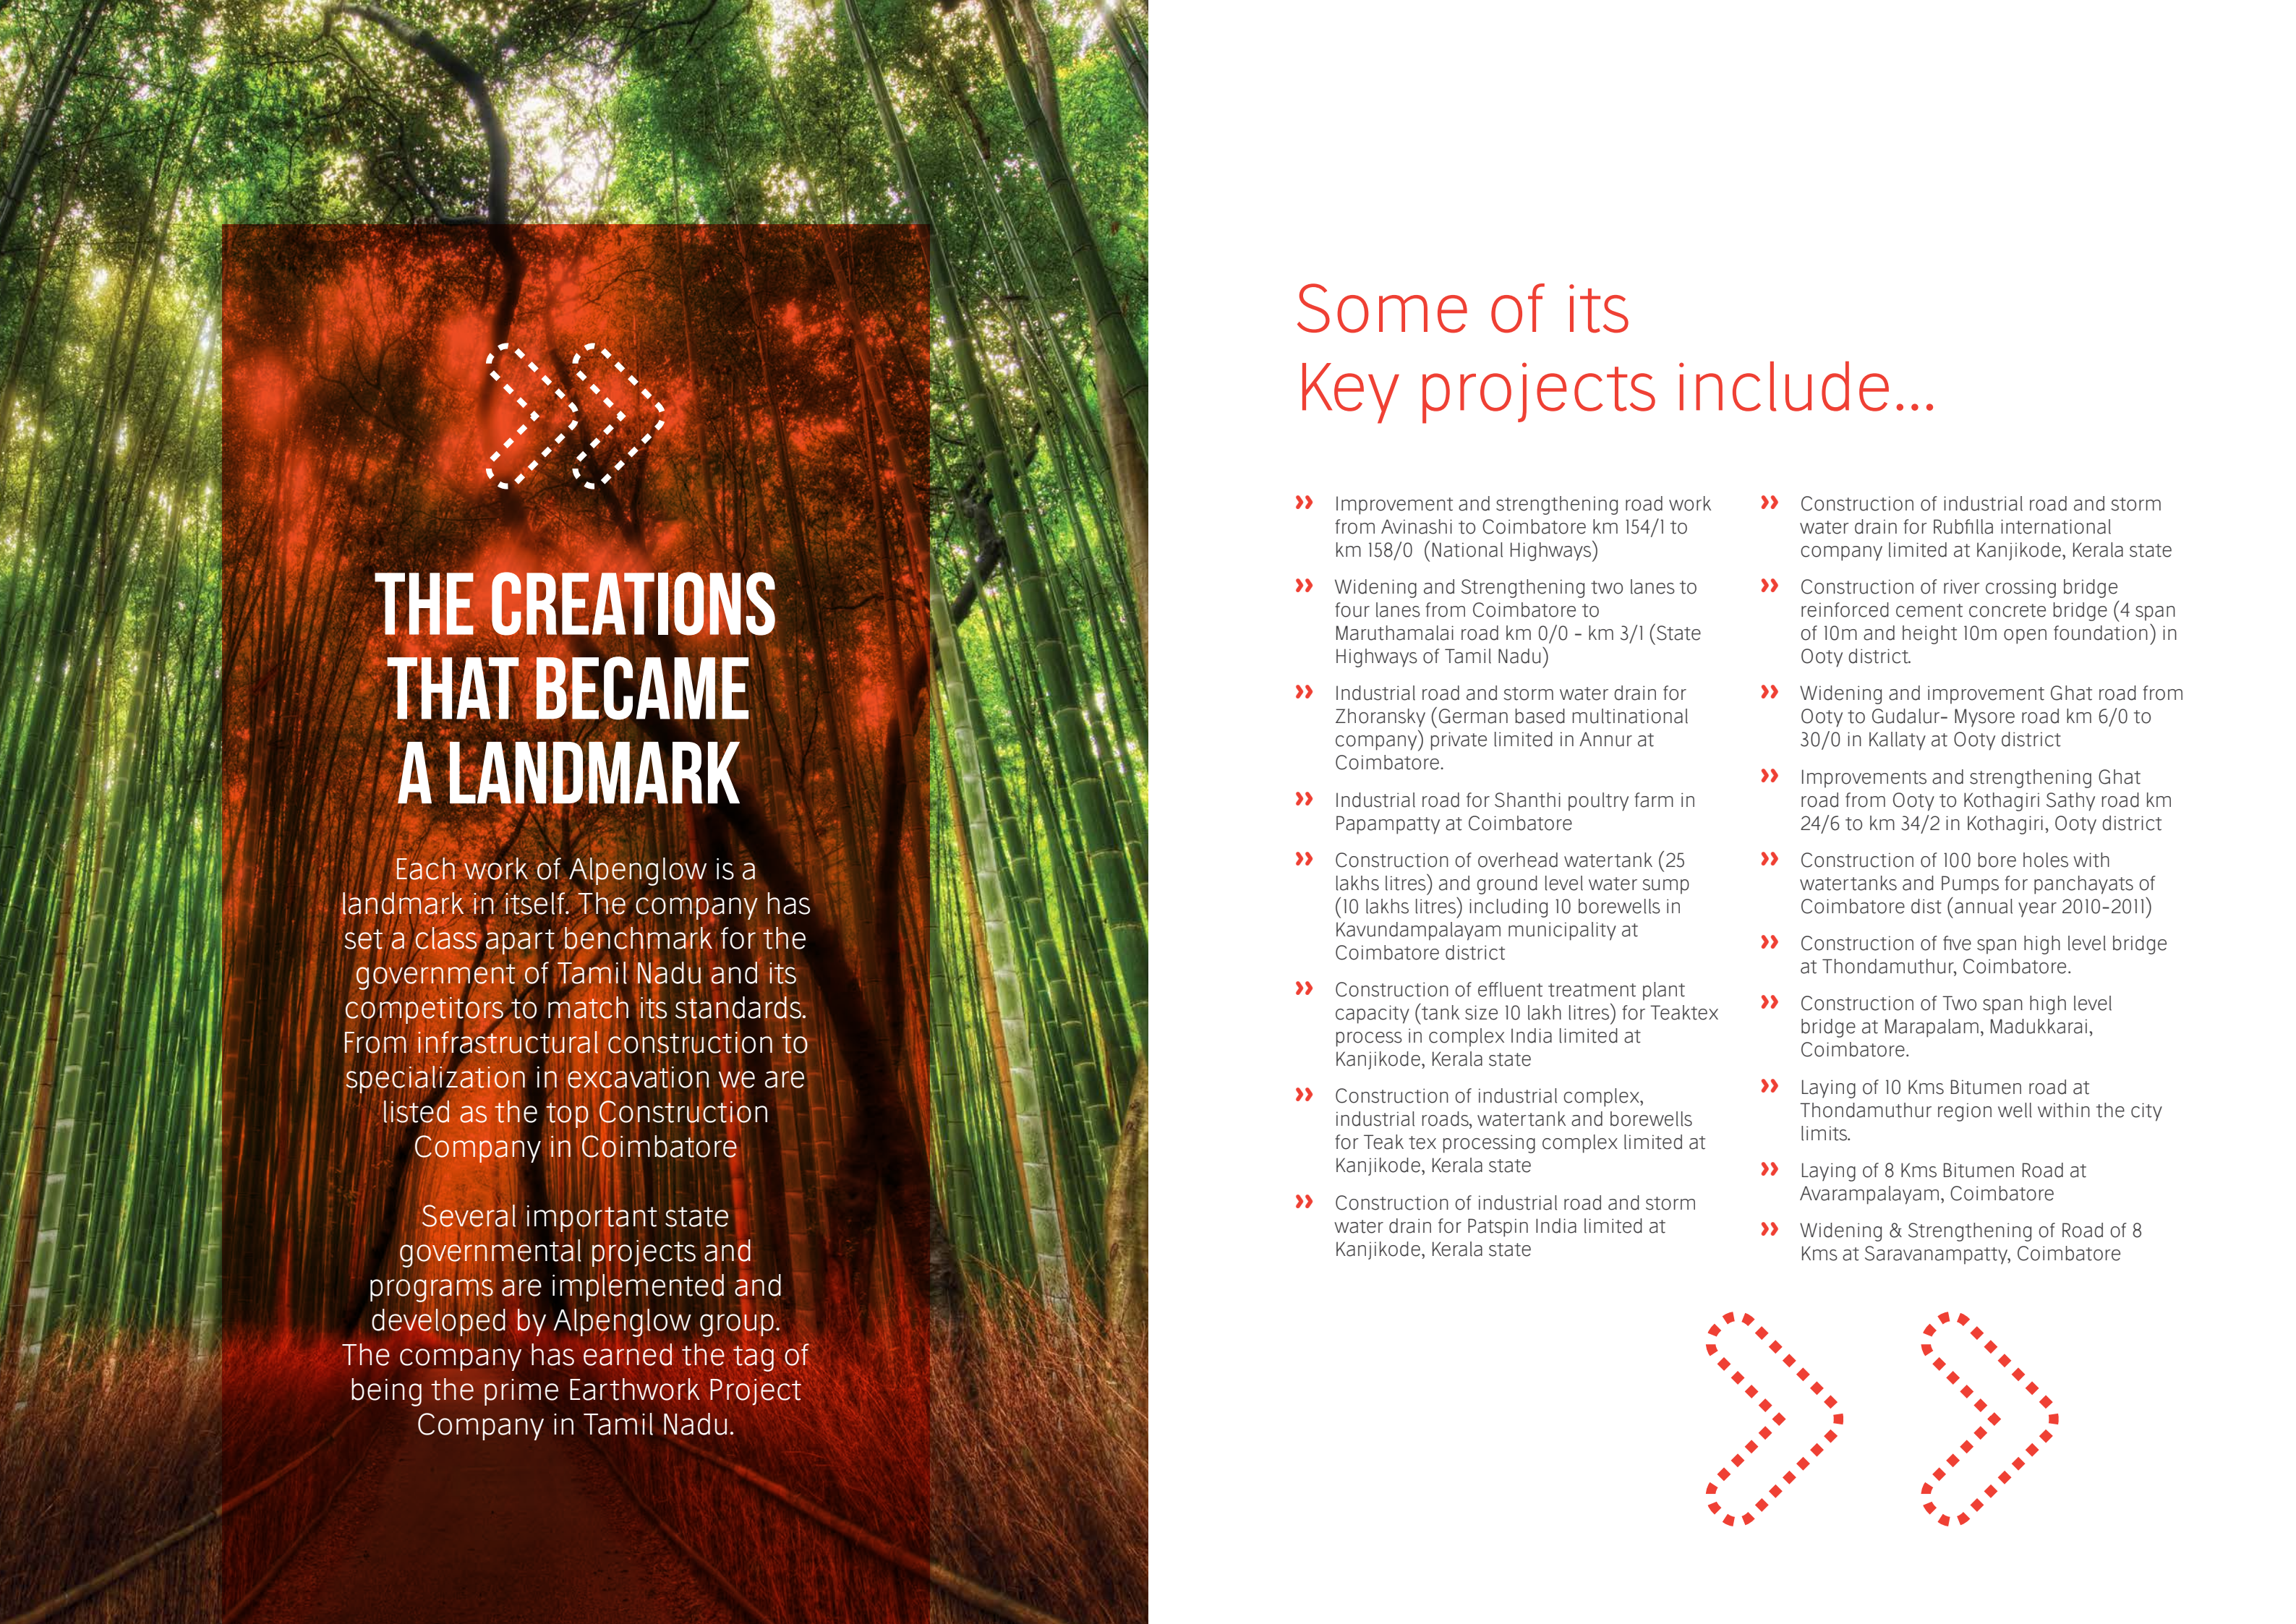

PART 2

Creating a bridge over a river is never easy especially when the construction was done decades back. The bridge was made two decades ago when most of the civil firms were not even equipped or skilled at making such a bridge.

The area was prone to floods and hence to solve the challenge a 6 span of 7mts Bridge was created in pile foundation. To keep the bridge sturdy and to speed up the work the men had worked below the waterline to ensure the foundation was strong.

Coffer dam was built to control and divert the flow of the water.

With skilled expertise, state of the art infrastructure and a passionate dedication the project was completed in just 3 months.

THE CREATIONS THAT BECAME A LANDMARK

Each work of Alpenglow is a landmark in itself. The company has set a class apart benchmark for the government of Tamil Nadu and its competitors to match its standards. From infrastructural construction to specialization in excavation we are listed as the top Construction Company in Coimbatore
