

**EXTRACTING  
THE GOODNESS OF NATURE**

# GUINEE FORAGE Making Resources Available.

## Why we started...

The earth is made up of 70% water, but only 1% of it can be consumed. With scarcity of water being the most critical problem in the world, we at **Guinee Forage** provide Borewell solutions to extract ground water without hampering the sustainability of the environment.

In just a short span of our establishment we are acknowledged as one of the most preferred and reliable multi disciplinary drilling contractors in Africa.

We are honed to offer suitable solutions for all kinds of water related problems. We are equipped with the latest technology, highly experienced drilling operators and dedicated technical personnel that make us the leading borewell drillers in Africa.

Right from inspecting the site to borewell cleaning and installation of pumps, we undertake all water extraction activities to uplift the living standards of the people.

We expertise in borewell drilling operations for various dimensions with depth ranging from 50 to 1500 meters, so that water is made available to every region of Africa.

## What we do..

Africa is known for its unique bio diversity, abundance of natural resources and raw beauty. As much as there is a lack of state of the art facilities and concrete living lifestyle, there is a need for development. We believe that with the development of the continent and facilitation of basic amenities to the people there would be a rise in the living standards of the people of Africa. Hence our endeavour is to extract the goodness of nature by making ground water available to the people. Our speciality lies in our usage of most up-to-date technology in borewells that are amicable on the sustainable environment.

**We are experts in drilling 4½", 6½", 8", 10" and 12" Dia borewells with super fast hydraulic rigs and experienced borewell drilling operators.**

### OUR WORKS INCLUDE

- \* Borewell Drilling
- \* Flushing and Rebore
- \* Feasibility Survey for Drilling
- \* 4½", 6½", 8", 10" and 12" inches dia borewell drilling
- \* Ability to handle multiple drilling
- \* Guidance for water Diviner/ Geologists
- \* Guidance for suitable submersible pumps
- \* Drilling for Farm Houses, agriculture practices, Infrastructure Projects, IT parks and Hospitality Industry
- \* Drilling for Industrial
- \* Drilling for Domestic & Residential purpose

## The people that make us

The progress of the enterprise always depends on the capability of its employees and employer.

Right from the labour to the highest official, each of our employed staff is skilled in his own field. They are selected with a common mission to deliver high level of customer satisfaction by providing quality output and real value for money.

The employees at Guinee Forage is not just motivated with financial profits but with a dream to make the nation of Africa self sufficient and worthy to live in.

## The difference experienced

## Our work that speaks for us

In a short span of nearly 4 years we have completed several Borewell projects in the city of Conarky, Republic of Guinee and in Republic of Sierra Leone.

Apart from this we have accomplished many projects in the other parts of Africa which speak of nothing but progress and quality.

In some barren parts of Africa we have drilled upto a great depth to extract water, after all the need for portable drinking water is primary to every living being.

Each of our work follows a pattern which makes us the leading borewell driller in Africa.

We begin with Geophysical Survey for ground water exploration, understand the topographic conditions, assess the depth of drilling required and discuss with the experts and technicians of suitable techniques / methods and begin drilling using the latest, time-tested Hydraulic rigs.

We discuss these with the clients and achieve results in time making our projects delivery cost effective and less time consuming.

Every company has a unique aspect that gives it an edge above the rest.

Our principle to make the resources of nature available to mankind without harming the nature makes us distinct from the rest.

Every effort of ours, be it the modern machinery, the labour, the company guidelines or the methodology, it is followed in a manner that mankind can extract the best of nature's giving.

We concentrate on offering value added services through our cutting edge technology, faster operations and after sales / service assistance that gives us an edge to our competitors.

We believe in following a rigorous approach to extract ground water so that the barren land can be used for various purposes.

Our drilling technique has benefitted multiple purposes like industrial, commercial, agricultural, construction and municipal applications.

We expertise in flushing and cleaning borehole through high pressure air compressor, which takes raw water, dust, or wastes and decayed particles out and makes ground water portable.

Moreover our highly experienced drilling operators and dedicated technical personnel are instilled with the motto of performing every task with perfection. No wonder in a short span we have empowered millions in Africa, gained a repute with international audience and our client base is spread over public and private sectors.
